

July 20, 1927.

Mrs. Mary Elegante,
Helper, Utah.

RE: PRICE RIVER DIST:

Dear Madam:

I have your letter of July 15, and would say that the proper course for you to take is to communicate with Water Commissioner Wayman at Price. It is absolutely impossible for me to direct the distribution from this office and Mr. Wayman thoroughly understands the situation.

When your attorney called at the office recently I pointed out that under the terms of your filing the water which you claim should legally be used on the DeMarco land I understood that your attorney was going to call later at the office and see what kind of arrangement could be made to change this situation.

In closing I would make the suggestion that all the quarreling which has taken place on Spring Canyon is not worth the results and that both you and the DeMarcos could get along with the water supply if you cared to follow the instructions of the Water Commissioner as the law provides and not try to run the matters yourselves.

Yours very truly,

OMB/C

State Engineer.
